

Finance English Printable Worksheet

Write the meaning of each term and then use it in a sentence.

revenue

Definition: income generated by selling goods or services

Example: We delivered over \$245 billion in annual revenue, up 16 percent year-over-year, and over \$109 billion in operating income, up 24 percent.

operating

Definition: related to the day-to-day running of a business

Example: We delivered over \$245 billion in annual revenue, up 16 percent year-over-year, and over \$109 billion in operating income, up 24 percent.

growth

Definition: an increase in size, sales, value, or performance

Example: These are long-term assets to drive new growth for the next decade and beyond, and ensure communities around the world have access to the compute they need to drive economic growth in this new era.

technology

Definition: scientific or digital tools used to create value

Example: We were founded in 1975 with a belief in creating technology that would enable others to create their own.

product

Definition: an item or service offered to customers

Example: Unilever is performing thousands of simulations with AI in the time it would take to run tens of laboratory experiments, as it accelerates its product development.

customer

Definition: a person or organization that buys goods or services

Example: Our new Dynamics 365 Contact Center infuses generative AI throughout the contact center workflow in a customer's existing CRM.

expense

Definition: a cost incurred in running a business
